

Email Sequence: ReplyFlow Onboarding & Conversion

Goal: Convert free trial users into paying customers by demonstrating value fast.

EMAIL 1 — Welcome + Instant Action

Subject: Your leads won't wait. Neither should you.

Hi [Name],

Welcome to ReplyFlow.

Here's what happens next: nothing changes until you connect your first lead source.

But here's what *can* happen in the next 24 hours:

- A lead comes in at 11 PM
- ReplyFlow responds in 2 seconds
- They book a meeting while you sleep
- You wake up to a qualified prospect

That's the goal.

Your first step (2 minutes):

Connect a form or landing page. Turn on instant responses.

ReplyFlow starts working immediately. No babysitting.

Need help? Reply to this email. A human writes back.

— The ReplyFlow Team

EMAIL 2 — The Pain (Short. Sharp.)

Subject: You're probably losing leads right now

Hi [Name],

Real talk.

How fast do you respond to new leads right now?

If the answer isn't "within seconds," you're losing deals.

Not because your offer is bad. Because someone else answered first.

Leads convert better when contacted immediately. Yet most teams respond in hours—or days.

That gap is where revenue disappears.

ReplyFlow closes that gap. Automatically. Instantly.

Login and connect your source. Or keep losing leads. Your call.

— ReplyFlow Team

EMAIL 3 — How It Works (No Fluff)

Subject: Here's exactly what happens when a lead comes in

Hi [Name],

One form submission. Here's the ReplyFlow sequence:

1. Lead fills out your form
2. ReplyFlow detects intent (no generic "thanks")
3. Personalized response sent within seconds
4. Smart qualifying questions asked automatically
5. Qualified lead books a meeting or gets routed

Your sales team doesn't lift a finger until someone is ready to buy.

Set it once. It runs forever.

If you haven't connected your lead source yet, do it now. Every hour you wait is a lead someone else wins.

— ReplyFlow Team

EMAIL 4 — Proof (One Story, Not Quotes)

Subject: From hours to seconds (real numbers)

Hi [Name],

A B2B service company was losing leads they didn't even know existed.

Leads came in overnight. Nobody replied until morning. By then, prospects had already booked with competitors.

They installed ReplyFlow.

Response time dropped from 8 hours to 4 seconds.

Booked calls doubled in two weeks.

Not because their product changed. Because their timing changed.

Your ReplyFlow is already set up. Is it running?

— ReplyFlow Team

EMAIL 5 — Final Push (No Games)

Subject: Your leads are still waiting

Hi [Name],

Every lead in your inbox is someone who raised their hand.

They're actively looking. Comparing options. Ready to talk.

The only difference between winning and losing is who responds first.

ReplyFlow makes sure it's you.

Not faster replies. Not just speed. Ownership of the conversation from the very first second.

If you've been putting off setup, stop.

Activate your workflow now. Let ReplyFlow handle first contact.

Because speed wins deals. Always.
